

Access Control & Security Fit for Your **Business** Offices | Retail | SMBs

- ✓ Scalable, Access Control & Security Solutions from a Few Doors to Thousands
- ✓ Range of Options Including Enterprise with Web Client, Web-Browser-Based Systems, Cloud-Based Hosted Systems (ACaaS)
- ✓ Integrated Video, Security & Wireless Locking
- ✓ Universal Identity & Visitor Management
- ✓ Multiphase Threat-Level Management
- ✓ Super-Fast Processing - Key In Peak High-Demand Periods
- ✓ Synergistic Panels & Software
- ✓ Open Architecture Integration; Easy Retrofits for Upgrades
- ✓ Global Lockdown
- ✓ Robust Multi-Database Partitioning - For Different Offices or Departments, etc.
- ✓ Numerous Technology & Integration Partners for Easy System Upgrades & Retrofits

Access Control & Security Solutions for Business

CAPABILITIES FOR TODAY & TOMORROW W/ LOW TOTAL COST OF OWNERSHIP

Continental® Enterprise Access Control & Security Management Platform & field-upgradeable hardware team up to create a scalable, high-tech system that integrates legacy structures and systems as well as future annexes & new construction. It supports **all identification systems**; smart cards, proximity, PINs & biometrics. It simultaneously supports multiple ID & reader formats. To meet the **high-traffic/peak-time routines**, the fast multitasking system provides door-open times of a fraction of a second, evaluating IDs at the panel. We'll grow with you, with onboard storage for up to 1 million IDs per panel & support for 1 to 32,000 doors; 30,000 access groups & over 32,000 readers per location, without having to change/upgrade software packages. This translates to lower total cost of ownership & affords facility administrators comprehensive, flexible area-specific access control & security management.

OPEN ARCHITECTURE & INTEGRATION WITH THIRD-PARTY SYSTEMS

Video & intrusion/fire systems integrate with advanced, partitionable databases spanning **visitor management, parking, human resources and finance systems**. **Continental Enterprise Platform** is Microsoft SQL Server database based, well-priced with no annual license fees for lowest TOC. **Import/export** utilities provide smooth data exchange of badge and personnel data, such as import-export of photos for an open exchange between ERP (human resources and IT management) time and attendance data or report generation. Its custom badging utility is easy, and the **visitor management system** has automatic badge-creation via scannable IDs and auto-expiring visitor/construction badges/IDs, too. With open architecture, use **LDAP Active Directory** to create an authorized cardholder profile on one system and pass that information along to other applicable systems.

Robust, Scalable, Continental Enterprise Access Control & Security Platform for Minimal TOC

- Control from 1 to 32,000 doors; up to 1,000,000 cardholders/panel
- Event transactions storage limited only to hard drive size
- 30,000 access groups and over 32,000 readers/ location, with no software to upgrade
- 5 Holiday calendars with 100 Holidays each
- Over 12,000 readers with 112,000 relay outputs per location
- Over 124,000 supervised alarm inputs per location

Seamless Wireless Locking Integration

- Real time integration as single-door controllers with Alarm Lock Trilogy® Networx® Wireless Locks and customizable ArchiTech® designer locks, including auto-scheduling of door open and lock times, audit trail and choice of credentials
- Wireless installation in about an hour to any door type. Grade 1 durability, longest battery life, built in Prox Reader &/or PIN
- Immediately function as standalone access locks, can be integrated on Continental at any time thereafter

Universal Identity Management Solution

- ID credential, smart card, and biometrics management system
- Onboard storage for up to 1 million cards or 500,000 full data PIVs
- LDAP compliant single sign-ons
- Supports Active Directory at cardholder level with popular third-party utilities; Javelin Software – AD Reporter®; Netwrix Auditor®; Management Engine – ADManager Plus®

SECURING PEOPLE, BUILDINGS & ASSETS 24-7 ONSITE OR REMOTELY

Facilities large and small can be well-secured by Continental Systems' real time monitoring and seamless **integration with most security (intrusion and fire) and video surveillance systems**, complete with dynamic maps, video PTZ and DVR/NVR control. Upon alarm, the **remote central office reporting** option can facilitate faster internal security or police response. Alarm events can trigger email or **SMS emergency alerts and video recording of the area**. **Continental's Threat Level Management System**, with an unlimited amount of assignable threat level groups and 5 color-coded states, supports instantly deactivating access privileges, by badge, or badgeholder-groups, with one mouse click. **Global Lockdown** can be activated by badgeholder, system operator or triggered script, including free access doors. In-list or muster reports can account for persons who need to be located, saving time and lives.

HIGH-SPEED MULTITASKING AT PEAK-TIMES

Continental's fast system offers cardholders door-open times of a fraction of a second, evaluating IDs at the panel. Easy **built-in elevator control**, is precision-scheduled by cardholder group(s), floor, building, free access or open-times. Also, **Global inputs/outputs** and activity links provide system wide and individual device control, including use of high/low counters, e.g., **parking facility control, by occupancy**. Continental enables access control and security tracking of people or assets on-site or remotely with **Remote Web Client**. Using Internet Explorer, administrators get 24/7 encrypted remote web access, re/configure hardware & software un/lock doors, get reports change privileges, etc.

Multiphase Threat Level Management and/or Lockdown by Group, Area or System Wide

Visitor Management Solution & Custom Photo Badging Utility Open Architecture Integration

- Microsoft SQL Server database based. Competitively priced – no annual software licensing fees for low total cost of ownership
- InterAccess - Open API support allowing third parties to seamlessly integrate Continental software and harness the power and speed of hardware
- Supports a wide range of technologies and databases including partitioning, as well as importing of Microsoft® Active Directory and Oracle® exports
- Advanced Import / Export Utilities. Open data exchange of badge and personnel, ERP & other databases (e.g. Oracle)

Seamless Universal Video, Security and ID Integration Solution from Single Station

- Integration with most security systems and offers a central reporting option
- Email and SMS notification
- Integrates with third-party manufacturers of video cameras, NVRs/DVRs, biometric devices and readers, intrusion, fire, etc
- Remote System Management via web client

Proven Hardware

- Flexible range of super-fast hardware from single-door POE solution, to wireless PIN/Prox door locks, to expandable conventional or Linux-embedded controllers from 2 to 16 doors
- High quality standards, NAPCO ISO9001; 2000 Certified manufacturing facility produces onboard power supplies, relay- and lightning/ESL-protection, etc
- Built-in labor savings, upgrade migration, low maintenance costs
- Long product line continuity even in legacy systems; many field upgradeable
- Industry's longest warrantees, up to 5 years

Super Fast Speeds Even at Peak Hours

- Fastest processing performance available, (up to 921.6 Kbps communications) i.e., door opens in a fraction of a second, rapid reports and full data downloads in minutes
- Global inputs/outputs and activity links for systemwide and individual device control

Napco Access Pro Solutions Are Integrated with a Growing Number of Systems & Partner Products

- All available through us, including Alarm Lock Trilogy, Networx & ArchiTech Wireless Access Locking, Napco Security & Fire Alarm Systems, Ganz Intelligent Video, Avigilon Video, Video Insight, Exacq, Milestone, Pelco, Salient, Hitron, Integral, BAS-IP Video Intercom, Idemia & Madeye Biometric Facial Recognition, Farpointe Data, OTIS Elevator
